USHA

USHA WATER HEATERS

THE LUXURY OF CHOICE
A SPLASH OF WARMTH

CHOOSE YOUR WARMTH

A water heater must be perfect for your home requirements and look equally stunning at the same time. Usha water heaters are available in different holding capacities, the most trendsetting shapes, and optimal heating capacities to suit your or your family's daily needs.

STORAGE WATER HEATERS

Perfect for larger bathrooms, Usha's storage water heaters offer consistent hot water with faster reheating, thanks to superior heating technology. Designed for everyday convenience and long-lasting performance, they come with enhanced safety features and energy-efficient insulation. Available in a variety of shapes, they fit seamlessly into your space while adding a modern touch.

LIVING INNOVATIONS

TECHNOLOGY OF HEATING SOLUTIONS THAT CHANGES LIVES

At Usha we believe that comfort can always be upgraded, safety can always be enhanced and heating solutions can be made more intuitive. Our teams of Innovation Engineers are constantly at work to make our range of water heaters more efficient, safer and smarter, so your life can be made more convenient.

We call this 'Living Innovations'.

TECHNOLOGY THAT CARES

ANTI-BACTERIAL STERILIZATION

Water heating system that simultaneously prevents bacterial build up and gives you pristine hot water.

WHIRL FLOW TECHNOLOGY

Get quick and energy efficient water heating with innovative inlet pipe facilitating circulation.

Efficient Heating Elements

Heavy gauge CopperPro heating element ensures durability and noise free heating heating elements.

Glass Line Enamel Coating

Get hot water year after year with cutting edge glass line enamel coating that prevents corrosion and increases life span.

Weather Proof Performance

IPX4 weather proof coating ensures protection against weather and splashes.

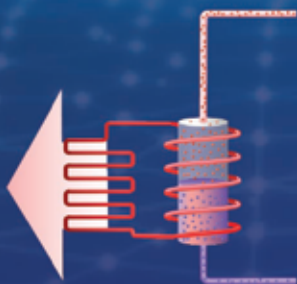

CAPILLARY THERMOSTAT

CE Certified and precision temperature control, to cut off electricity when temperature exceeds set limit.

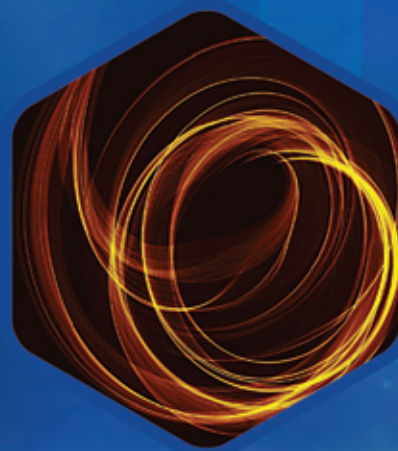

TEMPERATURE SENSOR AND THERMAL CUT OFF

Forget overheating, with automatic cut off the range never exceeds the set temperature.

PERFORMANCE BASED HEATTECH

This smart water heater enables 20% more hot water utilization and energy efficiency.

DRY HEATING PROTECTION

The device doesn't heat up in absence of water and keeps the elements protected.

ISI MARKED CERTIFIED

Products that bear the ISI mark are considered safe and reliable for use.

USHA WATER HEATER SMART SELECTION GUIDE

TIPS TO HELP YOU ON SELECTING THE RIGHT WATER HEATER CAPACITY.

Different bathing styles require different water usage: A bathtub, showers and the commonly used bucket, all consume different volume of heated water. Average warm water consumption in various usage options are as below.

COMFORTABLE WARM WATER TEMPERATURE

In Usha water heaters temperature can be set from 35°C-75°C. The comfortable range of warm water for the human body is in the range of 40°C-45°C.

When the surrounding temperature drops, the water flowing from the tap becomes colder. This situation requires a larger amount of hot water to be mixed in order to achieve the desired warmth. During colder weather, it's recommended to consider using a water heater with a higher capacity due to the increased demand for hot water. This will ensure that your hot water needs are adequately met despite the colder conditions.

WATER FLOW RATE

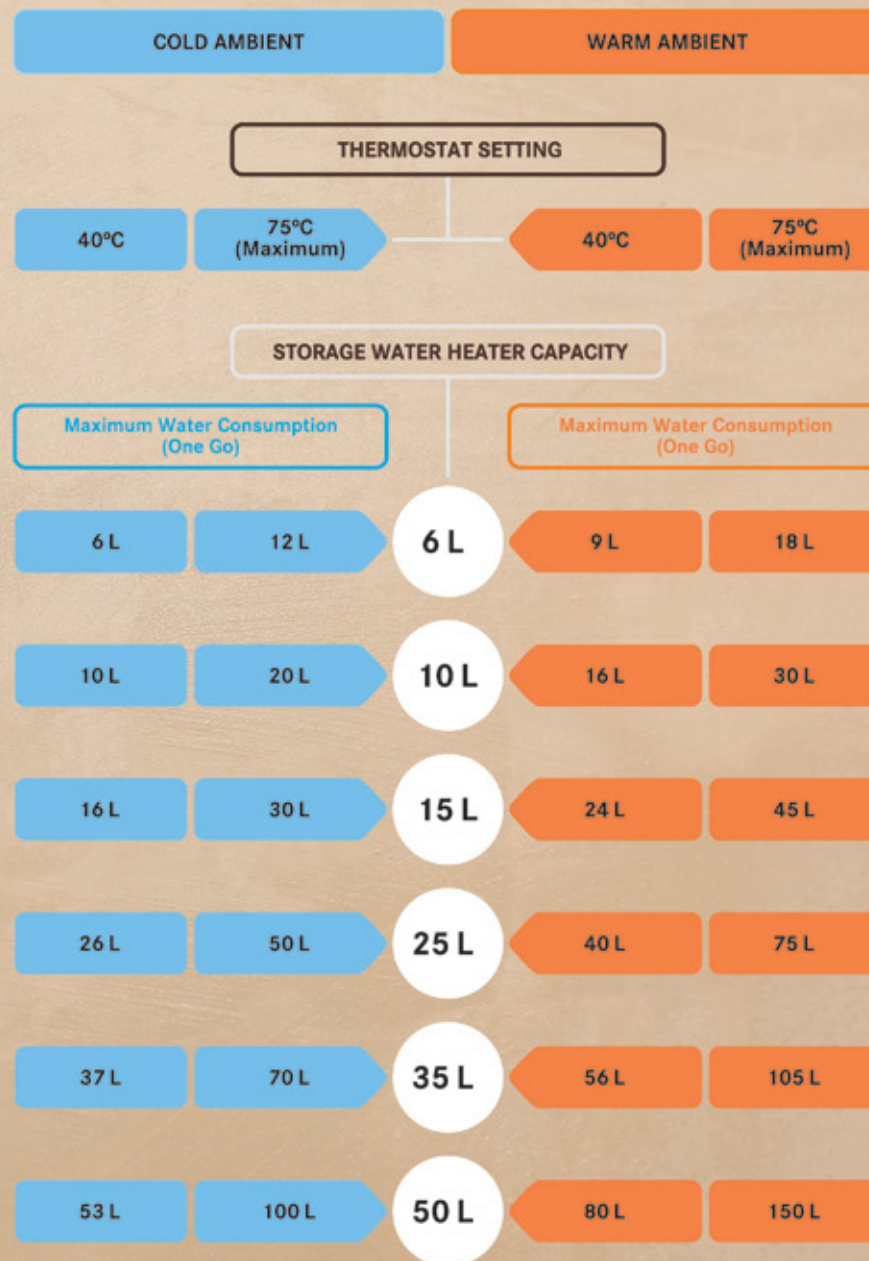

Water flow rate refers to the rate at which water flows into the water heater. The faster the speed of inlet water, the slower the water is heated to set temperature. In this scenario, it is desirable to go for a higher capacity Water Heater, as the pre-heated water in the tank will help modulate the drop in temperature due to the fast flowing inlet water and speedily provide water at the desired temperature.

SAVE ENERGY

Made to provide best in class performance and energy efficiency, USHA range of water heaters come with BEE 5 star rating, helping you save on your electricity bills. Choosing the optimum capacity of water heater further helps in reducing operating costs.

THE SMART SELECTION GUIDE AT A GLANCE

• The inlet water temperature considered for Cold ambient is at 10°C and for Warm ambient is at 20°C.

• In case of more than one user the water heater generally takes 15 to 25 minutes to reheat to desired temperature.

• All values mentioned above are as per average user consumption and are approximate.

WARMTH
SQUARED

CUBOID
MASTERPIECES
FROM THE USHA
WATER HEATER
COLLECTION

THE CUBIC
DESIGN
PHILOSOPHY.
NOW IN YOUR HOME.

From Cubic architecture, to cubic gadgets and devices, modernism and minimalism has been defined by compact geometric structure and forms. Find that sleek, unobtrusive use of space mesmerizingly captured in Usha's innovative square water heaters. Equipped to fit unobtrusively into any space, these water heaters are perfect for modern apartment living and an asset to the beauty of its interiors. Choose from our extensive Cubic Range of Bathroom Water Heaters and find the one that's apt for you.

Aquerra

The Usha Aquerra is quite the ally when it comes to your water heating needs. With upto 20% more heating, maximum energy saving, a temperature cut off and a pressure releasing safety valve; the Aquerra has all that it needs to become the safe and technologically enhanced choice for you.

Smart Features

WhirlFlow Technology

For faster heating and maximum energy saving.

ABS Design

ABS plastic compact cube shaped body combining performance with convenience and style.

Performance Based HeatTech

20% More Hot Water Utilization & Energy Efficiency.

Safety Features

Capillary Thermostat

CE Certified and precision temperature control, to cut off electricity when temperature exceeds set limit.

Dry Heating Protection

It stops heating when water supply is cut off, thus protecting elements from burning out.

Multifunctional IntelliValve

Releases pressure when temperature exceeds limit and prevents backflow of water. This also drains out water when safety is breached.

Weather Proofing IPX4

Ensures protection of parts against spills and splashes.

Salient Features

Superior Insulation

High grade superior PUF insulation reduces heat loss and improves energy efficiency.

Glass Line Coating

Protects tank for longer life.

Magnesium Anode Advantage

Heavy duty magnesium anode rod to prevent rust or corrosion and enhances life of element even with hard water.

Liquid Enamel Advantage

Liquid Enamel coated inlet/outlet pipe helps prevent rust.

AQUABUDDY NEO

White Grey

The new savvy addition to the cuboid range of Water heaters from USHA, Aquabuddy NEO is your perfect fit for the modern washroom. Moreover, it comes with a multitude of convenience and safety features such as glassline coated inner tank making it a delight for every household.

Aquabuddy	10 L	15 L	25 L
